The Democracy Clock: Event Log — Volume I is a contemporaneous public record of governance actions affecting democratic institutions in the United States.

Covering the 26-week period from January 20, 2025, through July 18, 2025, this volume documents executive actions, legislative developments, court decisions, enforcement practices, and institutional shifts as they occurred—week by week, without retrospective framing or narrative compression. Each entry records what happened, when it happened, and why it mattered for democratic governance at the time.

This book is not analysis or commentary. It is an archival log, compiled in real time to preserve a verified historical record of governance actions and institutional change. Events are documented consistently across governance domains and presented as a reference resource for researchers, journalists, legal scholars, and others seeking an accurate chronological account.

Volume I records the first twenty-six weeks of the archive. Volume II completes the record through January 16, 2026.
